ASPIRING FRONTEND DEVELOPER | B.TECH CSE STUDENT

PROFILE

Computer Science and Engineering student focused on building responsive, accessible and visually polished web applications. Hands-on experience with HTML, CSS, JavaScript, React, Git, GitHub and Netlify through practical projects. Also exploring Cybersecurity and Artificial Intelligence with a strong interest in continuous learning and real-world problem solving.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

Expected graduation: June 2028

Relevant learning: Data Structures, DBMS, Operating Systems, Computer Organization, Web Development, Java, Python and Computer Networks.

PROJECTS

Personal Portfolio Website

HTML, CSS, JavaScript, Netlify

- Designed and deployed a responsive personal portfolio with modern sections, smooth navigation and mobile-friendly layouts.
- Implemented reusable styling, project showcases, contact options and deployment through Netlify.

Flappy Bird Browser Game

HTML Canvas, CSS, JavaScript

- Built an interactive browser game with collision detection, scoring, sound effects and restart functionality.
- Used JavaScript animation loops and responsive controls to create smooth gameplay.

React Calculator

React, Hooks, CSS

- Created a component-based calculator with reusable Display, Keypad and Calculator components.
- Managed user input and calculation logic using React state.

Interactive Music Player

HTML, CSS, JavaScript

- Developed a music player interface with playback controls, progress handling and responsive visual design.

CERTIFICATIONS & LEARNING

Continuous learning through practical web-development courses, coding exercises and project-based study.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, responsive design

Frameworks: React, React Hooks, React Router

Programming: Java, Python, C/C++ fundamentals

Databases: SQL, DBMS concepts, normalization

Tools: Git, GitHub, VS Code, Netlify

Currently exploring: MERN stack, Cybersecurity, AI

STRENGTHS

- Responsive web design
- Problem solving and debugging
- Fast learner and self-motivated
- Clear communication
- Attention to visual detail
- Team collaboration

ACADEMIC KNOWLEDGE

- Data Structures and Algorithms
- Database Management Systems
- Operating Systems
- Object-Oriented Programming
- Computer Networks
- Computer Organization

ADDITIONAL INFORMATION

Location: Lucknow, India

Languages: English, Hindi

Career interests: Frontend Development, Cybersecurity and Artificial Intelligence

Availability: Open to internships, collaborative projects and entry-level opportunities
